

Addiction On Trial By Steven Kabela

Addiction On Trial By Steven

Addiction is a brain disorder characterized by compulsive engagement in rewarding stimuli despite adverse consequences. Despite the involvement of a number of psychosocial factors, a biological process – one which is induced by repeated exposure to an addictive stimulus – is the core pathology that drives the development and maintenance of an addiction.

Addiction - Wikipedia

It is said that addicts and alcoholics literally lose control of their substance use after a single drink or hit of a substance. This is the main feature of the disease model of addiction. But is it true? Do they really become zombies who have no choice but to relentlessly use drugs and alcohol? The [...]
