Cloud Atlas is a 2012 science fiction film written and directed by the Wachowskis and Tom Tykwer. Adapted from the 2004 novel of the same name by David Mitchell, the film has multiple plots occurring during six different eras in time; Mitchell described it as "a sort of pointillist mosaic." The film's synopsis describes it as "an exploration of how the actions of individual lives impact one ...

The development of a theoretically sound concept is an important challenge to unfold the potential of social innovation. Defining social innovation as a new combination or figuration of social practices allows integrating the many different (and sometimes conflicting) meanings of social innovation and offers a new perspective on the multiplicity of the concept of social innovation.
