It is the same when we multiply binomials! Instead of Alice and Betty, let's just use a and b , and Charles and David can be c and d :. We can multiply them in any order so long as each of the first two terms gets multiplied by each of the second two terms.. But there is a handy way to help us remember to multiply each term called "FOIL".It stands for "Firsts, Outers, Inners, Lasts":

Solutions to Derivatives Using the Limit Definition

Since the x in the second equation has a coefficient of 1, that would mean we would not have to divide by a number to solve for it and run the risk of having to work with fractions (YUCK). The easiest route here is to solve the second equation for x , and we definitely want to take the easy route.
