

## *Gas Chromatography Of Steroids In Biological Fluids*

### **Gas Chromatography Of Steroids In**

Gas chromatography-mass spectrometry (GC-MS) is an analytical method that combines the features of gas-chromatography and mass spectrometry to identify different substances within a test sample. Applications of GC-MS include drug detection, fire investigation, environmental analysis, explosives investigation, and identification of unknown samples, including that of material samples obtained ...

A General Reaction Scheme The most commonly used derivatization procedures involve the substitution of active hydrogens on the compound to be derivatized with a ...

### **Analytical Definition Derivatization for Gas Chromatography**

Chromatography: Chromatography, technique for separating the components, or solutes, of a mixture on the basis of the relative amounts of each solute distributed between a moving fluid stream, called the mobile phase, and a contiguous stationary phase. The mobile phase may be either a liquid or a gas, while the

Top Five Reasons to Switch. Gas chromatograph modularity – guarantees flexible instrument configuration and less downtime with our user-installable modular injectors and detectors NeverVent™ technology – Patented technology for replacing the source and the column without venting Innovative ion source technologies; Extractabrite Ion Source – wireless inert design uses NeverVent ...

### **Time to Switch - Thermo Scientific**

Liquid chromatography-mass spectrometry (LC-MS) is an analytical chemistry technique that combines the physical separation capabilities of liquid chromatography (or HPLC) with the mass analysis capabilities of mass spectrometry (MS). Coupled chromatography - MS systems are popular in chemical analysis because the individual capabilities of each technique are enhanced synergistically.

Clinical data. The use of ephedra-containing products in sports has been reported.Tokish 2004, Avois 2006, Dhar 2005 Few trials evaluating the ergogenic efficacy of ephedrine alone exist, and results suggest slight effects on performance. Tokish 2004, Shekelle 2003 However, combinations of ephedrine and caffeine have been reported to increase endurance in running and cycling experiments.
