

Handbook On Stuttering

Handbook On Stuttering

Stuttering, also known as stammering, is a speech disorder in which the flow of speech is disrupted by involuntary repetitions and prolongations of sounds, syllables, words or phrases as well as involuntary silent pauses or blocks in which the person who stutters is unable to produce sounds. The term stuttering is most commonly associated with involuntary sound repetition, but it also ...

This Virginian congressman has served in the U.S. House of Representatives since 1981. The longtime supporter of the Stuttering Foundation drew national attention to childhood stuttering in 2006 when he submitted an article about Tiger Woods from the SFA newsletter to the Congressional Record. The congressman is featured in the Stuttering Foundation's Famous People Who Stutter brochure.

Speech-language pathologists (sometimes called speech therapists) assess, diagnose, treat, and help to prevent communication and swallowing disorders in children and adults. Speech, language, and swallowing disorders result from a variety of causes, such as a stroke, brain injury, hearing loss, developmental delay, Parkinson's disease, a cleft palate, or autism.

Palilalia (from the Greek πάλιν (pálin) meaning "again" and λαλιά (laliá) meaning "speech" or "to talk"), a complex tic, is a language disorder characterized by the involuntary repetition of syllables, words, or phrases. It has features resembling other complex tics such as echolalia or coprolalia, but, unlike other aphasia, palilalia is based upon contextually correct speech.

Priapism, a relatively uncommon disorder, is a medical emergency. Although not all forms of priapism require immediate intervention, ischemic priapism is associated with progressive fibrosis of the cavernosal tissues and erectile dysfunction. This clinical guideline discusses evaluation, ischemic priapism, non-ischemic priapism, and stuttering priapism.
