BrainBashers - Puzzles and Brain Teasers

Optical illusions (sometimes called also visual illusions) are cool images perceived in a manner that differs from objective reality. What the human eye sees is interpreted by the brain in a way that contradicts physical measurement of the source image. You can find several types of cool optical illusions on this site all sorted into detailed categories located below and in menu on the right ...

Cool Optical Illusions - BrainDen.com

THANK YOU for posting this. I just took over a long term supply position with no plans in place and have to teach an art lesson tomorrow. This is simple, creative, and fits in with themes the children are reading about with "things not being what they seem" - going to introduce the project with some fun optical illusions on youtube.

Runde's Room: Optical Illusions in Art Class

Scary Optical Illusions are images where creepy things like skulls are hidden.. 2 different things can be found in the same picture. You should see another image if you look at each illusion from distance and another one when you look just normally.

Scary Optical Illusions - Creepy Things Hidden in Pictures

Illusions are fun for everyone, but kids tend to really love them! Illusions can vary pretty widely in nature. Some illusions are pictures that trick us into seeing something that isn't actually there while others get some people to see something entirely different than another person might see.

Brain Teasers | Hoagies' Kids & Teens

Color is energy... in fact it is an electromagnetic phenomenon, which depends on the way that light is reflected on the objects. Every object absorbs a part of the light which hits it and deflects the rest towards our eyes: this reflected light is interpreted by our brain as a particular color.

The Illusion of Colors - Archimedes-lab.org

We've posted on illusions in architecture before, but they've been historic ones, in Roman mosaic floors and in so-called trompe-l'oeil ceilings.. Here's a brilliant recent example, (2015) from Jamie Fobert Architects, for London's luxury shopping Burlington Arcade.

A fascinating visual perception test. I'm going to show you a video clip, in which there are two groups of people, a white team and a black team, and you are to count the number of times that the white team passes or bounces the ball to each other.

A fascinating visual perception test - Princeton University

Try staring at this image of a black bulb for at least 30 seconds, before looking away at a white screen or page. The light bulb will appear as a glowing white bulb, with the element becoming dark inside it.

Optical illusions - magic light bulb inverted negative ...

A famous perceptual illusion in which the brain switches between seeing a young girl and an old woman (or "wife" and "mother in law"). An anonymous German postcard from 1888 (left figure) depicts the image in its earliest known form, and a rendition on an advertisement for the Anchor Buggy Company from 1890 (center figure) provides another early example (IllusionWorks).
