

Near Miss Cablevision

Near Miss Cablevision

The one thing I don't miss about Cablevision, which I see on this sight everyday is the rat mentality....us FTTH guys are just busting our asses everyday, we do have quotas to meet and there will be problems with the build, my guess is about a 25% failure rate from what I've seen, we will be fixing the issues as well.

Near miss - post regarding Altice USA (Cablevision) layoffs

The safety of the general public, employees, and everyone associated with any project is of primary concern. Cablevision Communications firmly believes that accident prevention and safety are critical to quality service and employee productivity. The company strives to be accident free through adherence to standards; conduct of inspections; enforcement of safety rules; and investigation of ...

Cox Internet, Cable TV, Phone and Smart Home and Security

An ideal near miss event reporting system includes both mandatory (for incidents with high loss potential) and voluntary, non-punitive reporting by witnesses. A key to any near miss report is the "lesson learned". Near miss reporters can describe what they observed of the beginning of the event, and the factors that prevented loss from occurring.

Near miss (safety) - Wikipedia

Cable television is a system of delivering television programming to consumers via radio frequency (RF) signals transmitted through coaxial cables, or in more recent systems, light pulses through fiber-optic cables. This contrasts with broadcast television (also known as terrestrial television), in which the television signal is transmitted over the air by radio waves and received by a ...

Cable television - Wikipedia

Some health and safety professionals also refer to near misses as close calls, narrow escapes, good catches, or near hits. What's the difference between an accident and a near miss? Unlike a near miss, an accident is a type of incident that does cause an employee injury or illness, or property damage.

Why is near miss reporting important? - industrysafe.com

A near miss is an unintentional incident that could have caused damage, injury or death but was narrowly avoided. In the context of safety, a near miss may be attributed to human error, or might be a result of faulty safety systems or processes in an organization. A near miss may also be called a close call, near collision or near hit.
