Supersymmetry And Its Applications Superstrings

In theoretical physics, supergravity (supergravity theory; SUGRA for short) is a modern field theory that combines the principles of supersymmetry and general relativity; in contrast to non-gravitational supersymmetric theories such as the Minimal Supersymmetric Standard Model. Supergravity is the gauge theory of local supersymmetry. Since the supersymmetry (SUSY) generators form together with ...

Supergravity - Wikipedia

In algebraic geometry and theoretical physics, mirror symmetry is a relationship between geometric objects called Calabi-Yau manifolds. The term refers to a situation where two Calabi-Yau manifolds look very different geometrically but are nevertheless equivalent when employed as extra dimensions of string theory.. Mirror symmetry was originally discovered by physicists.

Each year, ICTP organizes more than 60 international conferences and workshops, along with numerous seminars and colloquiums. These activities keep the Centre at the forefront of global scientific research and enable ICTP staff scientists to offer Centre associates, fellows and conference participants a broad range of research opportunities.

ICTP - Scientific Calendar

Throughout the year, IHES organises numerous events: seminars or informal talks, series of lectures and summer schools or international conferences over one to several days which can bring together a hundred or so participants, who come from Paris and surrounding area, other parts of France or other countries.
