The Pumpkin Seed

A pumpkin seed, also known as a pepita (from the Mexican Spanish: pepita de calabaza, "little seed of squash"), is the edible seed of a pumpkin or certain other cultivars of squash. The seeds are typically flat and asymmetrically oval, has a white outer husk, and is light green in color after the husk is removed. Some cultivars are huskless, and are grown only for their edible seed.

Pumpkin seed - Wikipedia

What's New and Beneficial About Pumpkin seeds. Pumpkin seeds have long been valued as a source of the mineral zinc, and the World Health Organization recommends their consumption as a good way of obtaining this nutrient. If you want to maximize the amount of zinc that you will be getting from your pumpkin seeds, we recommend that you consider purchasing them in unshelled form.
