The epigenome is a multitude of chemical compounds that can tell the genome what to do. The human genome is the complete assembly of DNA (deoxyribonucleic acid)-about 3 billion base pairs - that makes each individual unique. DNA holds the instructions for building the proteins that carry out a variety of functions in a cell.

How Many Muscles Are In The Human Body? | eNotes

[503 begins ->] The anthropologist has become so familiar with the diversity of ways in which different people behave in similar situations that he is not apt to be surprised by even the most exotic customs. In fact, if all of the logically possible combinations of behavior have not been found somewhere in the world, he is apt to suspect that they must be present in some yet undescribed tribe.

Question: "Does Jesus have a physical body in heaven?" Answer: The physical, bodily resurrection of Jesus is foundational to Christian doctrine and our hope of heaven. Because Jesus rose from the dead with a physical body, every Christian has the guarantee of his own bodily resurrection (John 5:21, 28; Romans 8:23).
