

The Isf Benchmark Information Security Forum

The Isf Benchmark Information Security

The ISF Benchmark is a strategic tool available to ISF Member organisations. At a time when organisations are being asked to demonstrate their resilience to cyber threats by government, suppliers and customers alike, the Benchmark provides that objective analysis allowing you to measure both the effectiveness and value of your security investments.

The ISF Benchmark - Information Security Forum

The ISF Benchmark provides organisations with the ability to understand their approach to information security. It does this by helping the security function to: -assess their organisation's controls at a high-level, mid-level or detailed level

THE ISF BENCHMARK - Information Security Forum

ISF Benchmark (Information Security Assessment, Controls Assurance and ISO27001/2 Readiness)
The Benchmark shows how your security arrangements stack up against the Standard, and also against internationally recognised standards. In addition, the Benchmark enables you to demonstrate how your organisation's control status rates against that of other leading organisations around the world.
